 - (ii) Where it is necessary to have windows closed to achieve the acoustic design requirements, an alternative ventilation system shall be provided. Any such ventilation system shall be designed to satisfy the requirements of the Building Code and achieve a level of no more than NC30 in any habitable room.
- b) The standard in (a) above does not apply to noise sensitive activities which can comply with the following:
- (i) The habitable room within the noise sensitive activity is greater than 80 metres from the edge of the nearest traffic lane where the posted speed limit is at least 70km/hour; or
