

TOP TIPS FOR YOUR PAPER & CARDBOARD

GETTING YOUR RECYCLING READY

START BY...

Emptying

collapsing

and flattening all of your cardboard (you can cut down your larger pieces).

We've pulled together our top tips to make the most of your paper & cardboard crate.

FILLING YOUR CRATE

Squash everything down as much as you can - even your egg cartons.

LAYER IT

Put your smaller items like toilet paper rolls and household packaging at the bottom. Finish with the bigger boxes on top.

OR

PACK IT TIGHTLY

Place your folded boxes in your crate next to one another and slide the smaller items in-between.

SECURING YOUR CRATE

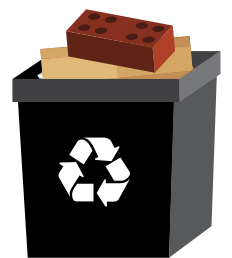

Fold a big piece of cardboard in the shape of a staple to tuck over the top of everything.

Push the folded piece down nice and firmly.

TOP TIP:

If you don't have a bigger piece of cardboard you can place a brick or stone on top. Our contractors will take it off and put it back.

PUTTING OUT YOUR CRATE

If you've got lots of cardboard you might like to use more than one crate, or take excess to one of our transfer or recycling stations.

Please do not stack any other crates on top of your cardboard crate - this way our contractors won't miss it.

KEEP IT KERBSIDE

Help our contractors by putting your crates right at the kerb.
